

# Daniel Duclos-Cavalcanti

## Computer Engineer

516-912-7975 | New York, NY | U.S. Citizen | [me@duclos.dev](mailto:me@duclos.dev) | [www.duclos.dev](http://www.duclos.dev) | [linkedin](#) | [github](#)

### SUMMARY

Creative thinker and problem-solver with a masters and bachelors in traditional german electrical engineering. Today, I am in New York, collaborating on exciting research with Dr.Sivaraman (NYU) that envisions a financial exchange on the cloud.

### TECHNICAL SKILLS

**Languages:** C, C++, Python, Golang, Rust, Bash, Lua, VHDL, Tcl, JavaScript, HTML/CSS  
**Tools:** Terraform, Docker, Packer, AWS, Google Cloud (GCP), Git, Unix Shell, Makefile, CMake, Linux, Jenkins, Vim  
**Technologies:** Cloud Computing, Computer Networking, Machine Learning, SoC, FPGA, RTOS, IoT, HPC, TinyML  
**Frameworks:** ZeroMQ, DPDK, Tensorflow, TFLite, Numpy, Pandas, OpenMPI, OpenMP, Xilinx Vivado  
**Certificates:** UCSD: Data Structures Fundamentals, UT Austin: Embedded Systems - uC I/O

### EXPERIENCE

**Research Assistant** Jul 2022 – Oct 2022  
*TU Munich* *Munich, Germany*

- Generated reports to establish a Design-Space Exploration framework to guide ML model deployments.
- Evaluated and compared the performance of various Machine Learning models across GPUs, CPUs and TPUs.
- Analyzed USB traffic through PyShark between the host and externally added TPUs.

**Embedded Engineer Intern** Aug 2021 – Jan 2022  
*Molabo GmbH* *Ottobrunn, Germany*

- Developed tooling for state simulations of their electric motor via Linux's virtual CAN interface and mock APIs.
- Added unit-tests and code coverage to safety critical features of their motor drive embedded controller.
- Extended an automatic firmware update functionality used by over 20 clients.
- Streamlined build and testing workflows via Jenkins and CMake for a team of over 10 engineers.

**Tutor - Embedded Systems Programming Lab** Apr 2021 – Aug 2021  
*TU Munich* *Munich, Germany*

- Supervised and aided 20+ students on their final embedded FreeRTOS laboratory projects in C.

### PUBLICATIONS

**Jasper: Fair Multicast for Financial Exchanges in the Cloud** | *(Paper)* Jan 24 – Present

- Novel cloud hosted financial exchange achieving low latency multicast service for up to 1000 market participants.
- Achieves better scalability and around 50% lower latency than the multicast service provided by AWS.
- Used kernel-bypass techniques (DPDK) to achieve ultra-low latency at up to 35K multicast packet rate.

### PROJECTS

**Open-MPI Value Iteration** | *C++, Multi-Threaded, HPC* Sept 2021 – Feb 2022

- Asynchronous value iteration model to distribute workload on an HPC cluster.

**Hamming Code Error Detection** | *C, VHDL, FPGA, SoC* Oct 2022 – March 2023

- Error detection/correction algorithm for packet transmission on Microsemi's SF2 FPGA/SoC.

**FreeRTOS-SpaceInvaders** | *C, RTOS, Multi-Threaded* Aug 2020 – March 2021

- Implemented the famous arcade game as a multi-threaded FreeRTOS application in C.

### EDUCATION

**New York University: Courant Institute of Mathematical Sciences** Sept 2023 – May 2024  
*Computer Science - Visiting Non-Degree Graduate Student* *GPA 4.0*

- Co-Authored Publication: Jasper: Fair Multicast for Financial Exchanges in the Cloud
- Related Coursework:** Operating Systems, Technologies in Finance

**Technical University of Munich** Oct 2020 – **Sept 2024**  
*M.Sc. Electrical and Computer Engineering* *Expected GPA: 3.2*

- M.Sc. Thesis: **VM Selection Heuristic for Multicast Overlay Trees in the Cloud**
- Related Coursework:** Machine Learning Methods and Tools, Embedded Design for Machine Learning, Chips Multicore Processors, Secure SoCs for IoT, High Performance Computing for Machine Intelligence

**Technical University of Munich** Oct 2016 – Sept 2020  
*B.Sc. Electrical and Computer Engineering*
