

Daniel Duclos-Cavalcanti

Computer Engineer

516-912-7975 | New York, NY | U.S. Citizen | me@duclos.dev | www.duclos.dev | [linkedin](#) | [github](#)

SUMMARY

Creative thinker and problem-solver with a masters and bachelors in computer engineering from Germany. Today, I am in New York, collaborating on research with Dr.Sivaraman (NYU) on distributed low-latency networking on the cloud.

TECHNICAL SKILLS

Languages: C++, Python, Golang, Rust, C, Bash, JavaScript, HTML, CSS, Lua, VHDL

Cloud Services: Google Cloud Platform (GCP), Amazon EC2 (AWS), Terraform, Packer, Vagrant

Tools: Linux, Unix Shell, Git, Github CI/CD, Jenkins, CMake, GNU Make, Bazel, Vim, VSCode

Technologies: Docker, ZeroMQ, DPDK, MPI, FreeRTOS, FPGA, IoT, TensorFlow, Scipy, NumPy, Pandas, OpenMP

Verbal/Written: German – Fluent, Portuguese – Fluent

EXPERIENCE

Research Assistant

Jul 2022 – Oct 2022

TU Munich

Munich, Germany

- Worked on TensorDSE, a Design-Space Exploration framework to guide machine learning model deployments.
- Evaluated the performance of various ML models across GPUs, CPUs and TPUs with TensorFlow Lite.
- Generated cost analysis reports for Google's Coral Edge TPU via USB traffic analysis (PyShark) during inference.
- TensorDSE used reports to distribute a model's inference/deployment optimally onto available hardware devices.

Embedded Software Engineer – Internship

Aug 2021 – Jan 2022

Molabo GmbH

Ottobrunn, Germany

- Added unit-tests (GTest) and code coverage (lcov) to safety critical features of their motor's embedded controller.
- Developed tooling for state simulations of their electric motor via Linux's virtual CAN interface and mock APIs.
- Extended their firmware update system used by 20+ clients, consisting of partial updates via CAN bus.
- Automated build and testing workflows via Jenkinsfiles, Makefiles and CMake for a team of over 10 engineers.

Tutor - Embedded Systems Programming Lab

Apr 2021 – Aug 2021

TU Munich

Munich, Germany

- Supervised and aided 20+ students on their final embedded FreeRTOS laboratory projects in C.

PROJECTS

Cloud-TreeBuilder | GCP, ZMQ, Terraform, Python, C++, Distributed Systems, Heuristic

Mar 2024 – Present

- Launches and selects K out of N VMs in a cluster to create an optimal multicast tree of depth D and fan-out F.
- Deploys UDP based probe jobs on VM subsets, collecting data regarding their network performance (JSON).
- Applies a developed heuristic to examine collected data and select VMs for a tree layer by layer.

Open-MPI Value Iteration | C++, Parallel-Computing, MPI, HPC

- Uses MPI techniques to distribute workload across an HPC cluster to solve a stochastic navigation problem.

Hamming Code Error Detection (16,11) | C, VHDL, FPGA, SoC, UART

- Implemented an error detection/correction algorithm for packet transmission on Microsemi's SF2 FPGA/SoC.

PUBLICATIONS

Design and Implementation of A Scalable Financial Exchange in the Cloud | *(Paper)*

Jan 2024 – Present

- Novel Cloud financial exchange achieving low latency of $\leq 250 \mu s$, with a difference $< 1 \mu s$ for 1K receivers.
- Achieves better scalability and around 50% lower latency than the multicast service provided by AWS.
- Used kernel-bypass techniques (DPDK) to scale performance up to a 35K multicast packet rate.

EDUCATION

New York University: Courant Institute of Mathematical Sciences

Sept 2023 – May 2024

Computer Science - Visiting Non-Degree Graduate Student

GPA 4.0

- Co-Authored Publication: Design and Implementation of A Scalable Financial Exchange in the Cloud
- **Related Coursework:** Operating Systems, Technologies in Finance

Technical University of Munich

Oct 2020 – Oct 2024

M.Sc. Electrical and Computer Engineering

Munich, Germany

- M.Sc. Thesis: **VM Selection Heuristic for Multicast Overlay Trees in the Cloud**
- **Related Coursework:** Machine Learning Methods, Embedded Design for ML, High Performance Computing Lab

Technical University of Munich

Oct 2016 – Sept 2020

B.Sc. Electrical and Computer Engineering

Munich, Germany
